

# Flying Saucer Seen by C'drs!

Queanbeyan district's first reported sighting of a possible "flying saucer" was made yesterday afternoon when two Yerrumulla Shire councillors sighted a strange, fast-moving aerial object near Foxlow Station.

Councillors G. V. Burnett and T. P. Kerr sighted the object at about 5.40 p.m. as they were returning to Captain's Flat after a meeting at Queanbeyan.

C<sup>r</sup>. Burnett said this morning they saw simultaneously what at first appeared to be a meteor falling at a pitch of about 30 degrees.

The object flattened out at about 500 feet, he said.

C<sup>r</sup>. Burnett judged this height by the fact that they could see a hill behind the object.

He described it as being shaped like a cigar, glowing and bright pale green in color.

In collaboration with Cr. Kerr he has made a sketch of what they saw. This sketch resembles a blunt nosed, long and tapered balloon flaring out at the tail.

Both agreed they could not see very much detail.

They agreed that as the object flattened out it either discarded some thing or a burst of light came from its tail and it shot away on a level plane at terrific speed.

Cr. Burnett estimated that it was in their full view for at least a minute.

About a fortnight ago, a strange glowing light was seen in the sky south-east of Queanbeyan by a large number of people.

Mr. Rex Cross, of Commonwealth Avenue, phoned The Age at that time, but the light was not visible from The Age Office.

Mr. Cross and a number of his neighbors watched it for quite a long time and, for want of some better explanation, conceded that it must have been a particularly bright star. Nevertheless the watchers maintained that the light moved.
