## **FLYING SAUCER OVER MERRIWA?**

Some of our golfing enthusiasts are reported to have seen a strange aerial object whilst playing on the links last Saturday afternoon. This was vaguely described as of a circular shape, looking like aluminium, and making no noise—shining in the rays of the western sun, which made observation difficult. It was described as suddenly disappearing from view in the western sky. It is not known whether the “flying saucer” was seen before or after the 19th hole, but there has been some scepticism aroused by the report.
