

# Jet Seeking Sky Object

AN RAAF Vampire on a training flight has been diverted to investigate a flying saucer report from Mundijong and Mardella.

A greyish-white object was seen in the sky over these two places about 11 a.m., today, according to reports.

It was so plain that the townships of both places turned out to see it.

People continued to watch the object until at least 2.15 p.m.

Eric Webb and his brother were working on the farm when a Vampire jet aircraft passed over at 11 a.m.

Soon afterwards the brothers noticed a small greyish-white object "eagle-shaped" hovering about where the aircraft had disappeared.

When they looked later it had disappeared too, but it appeared again and again.

• *On January 8 the RAAF revealed that it had been investigating flying saucer reports since 1947. Each report is investigated by an*

port is investigated by an RAAF intelligence officer and 24 questions are put to the person making the report and tabulated in a two-page "report on aerial object observed" form.
