

Northam's Got One, Too

NORTHAM, Fri: Not to be outdone by Mundijong, Northam today came into the picture with flying saucer news.

Last night Mrs. Antonio, of Southern Brook, reported to the Northam police that she, her daughter Helen and her daughter-in-law Mrs. Pat Antonio, saw a big, oblong, grey object at a great distance, low on the horizon over Northam at 12.15 p.m.

The sky was clear. "It was there one minute and then it was gone," said Mrs. Antonio.

Mundijong's "flying saucer" — a bright object in the sky — was shot down (verbally) by the RAAF at 4 p.m. yesterday. It was the planet Venus.
