

Meteor Seen at Bowral

BRIGHT LIGHT IN SKY

On Monday afternoon the Mail was advised by a Burradoo resident of a strange light in the sky made by an object travelling at high speed. Soon afterwards, Miss Harris, of Mittagong Road, telephoned regarding witnessing a similar occurrence. Two junior golfers, *Gerald Focken* and *Ron Barlow*, who were playing on the Country Club links, were also witnesses. Mr. W. C. Andreas, who lives in Eridge Park Road, also saw this phenomenon. The meteor left a vapour trail seen by all witnesses.

Subsequently it was reported that the object was a meteorite which fell into the sea six miles east of Ulladulla.

In the Berrima District, it appeared at a low angle and has been described by different witnesses as being accompanied by a white, blue and orange light.
