# **STRANGE LIGHT IN CITY SKY**

Many people last night saw a strange light in the city sky.

They said the light resembled an electric light globe.

The light was about 10 times the size of a star.

Gilbert Barrow, an instrument maker, of Undercliffe, estimated the object was at 12,000 feet.

J. Shortland, of Strathfield, watched the object for 20 minutes, until it disappeared in the west.

Both men saw the object about 9 o'clock.
