

## Strange Light Over Moonta

MOONTA, Oct. 19.

Mr. Hugh Kemp, of Moonta Bay, said today that last night he saw a ~~strange~~ bright light in the south-western sky changing color several times.

After 10 minutes it turned red and disappeared.

Mr. Kemp's description of the light is similar to that given by Port Pirie people who reported a light "which changed color several times" hovering in the sky on Saturday night.

**PORT PIRIE, Oct. 19.**—The strange light in the sky, sighted by Port Pirie residents earlier this week, reappeared again last night.

It was seen from the Port Pirie police station just before 9 p.m. moving slowly southward and changing color from red to green and orange.
