

Flying saucer

INHABITANTS of the small East Java town of Bondowoso are reported to have seen on Monday night what they thought was a "flying saucer" of greenish colour, which made a revolving movement. The Indonesian Newsagency Antara reported that the object was seen at 9 p.m. It came from the southeast and was sighted over Bondowoso for about half a minute and disappeared in a north-westerly direction. On July 25 a similar object was seen at the same place.
