

INTEREST IN ASTRONOMY

Flying saucer reports are believed to be the cause of the great interest in a short new Workers' Educational Association course on astronomy.

The WEA secretary, Mr. C. R. Lawton, said today the course would be of six weekly lectures and would begin on Tuesday.

The lecturer would be Prof. L. G. H. Huxley.

On Wednesday, Mr. A. Rendell would begin a short course on English for every day, and on Thursday Mr. T. G. H. Strehlow would begin a five-week course on the Australian aboriginal.
