

NOW, HAVE YOU SEEN A SAUCER?

THE Australian Flying Saucer Investigation Committee wants to obtain more details about the "object" seen by six people flying from Sunshine to the Dandenongs early Sunday morning.

Mr. A. W. Walker, treasurer, said last night details he had read were not sufficient to enable him to say definitely what it was.

"We would like people who saw the object to send us written reports giving all details of shape, size, color, whether there were portholes visible, and so on," he said.

"From available details the object could have been a meteor, but if we could obtain more information this opinion could be changed."

**... MORE INFORMATION HIS
opinion could be changed."**

Mr. Walker said that people who saw the object should contact the society's secretary, Mr. L. Whitney, 15 Wright st., Essendon.
