

# Facts on flying saucers withheld, he claims

**ADELAIDE:** The Australian Security Service is hiding very important facts from us, the president of the Australian Flying Saucer Research Society, Mr. Fred Stone, of Kilburn, says.

These facts concern reports of flying saucers which authorities are unable to explain, he claims.

Mr. Stone says that official photographs of supposed saucer flights have never been released to the public.

Members of the society in Adelaide have been advised to contact their Parliamentary representatives in an effort to get such information released.

This was done in America recently, with the surprising result that authorities released many of their reports regarded previously as "top secret," Mr. Stone said.

"Even if the Australian Security Service has found positive evidence of visitors from outer space, I'm sure the public would like to know," he added.
