

Katoomba Lights Mystery Again

SYDNEY, Thursday. —
An "unidentified flying object" was seen by hundreds of people high over Katoomba again to-night.

It was the third time the object had been seen this week.

Crowds keeping watch to-night saw a red light appear at 8 o'clock.

Eye-witnesses said the light changed from red to green to yellow and back to red.

It then moved off rapidly in a south-westerly direction.

A correspondent reported that the object was "definitely not a star or an aircraft."
