

Mystery Object Reported Over Victoria

GEELONG, Tuesday. — Reports of a mysterious glowing object in the sky were again received here to-night.

Similar reports were received last night and in both cases they came from widely scattered areas.

The reports last night came from as far apart as Anakie and Torquay.

All witnesses agreed in every detail about the object's description and behaviour.

The most detailed report came from Mr. Graham Stewart, of Maude, who was shooting rabbits with the aid of a spotlight.

Mr. Stewart said the object was flying north at a fairly fast speed and quite low. He described it

quite low. He described it as oval and about the size of a medium sedan car.

Its contours were unbroken by wings or projections.

Mr. Stewart said it appeared to be a solid structure and compared the glow of light which surrounded it to a coating of luminous paint.
