

Extract from
Melbourne Age, Australia

30 JUL 1957

WE are not among those fortunates who have lately spotted unidentified flying objects around the skies of Australia. The saucers and the little men with pointed heads have so far eluded us. 3134

But if we do chance on some such phenomenon, we now know what to do—telephone the U.F.O. Research Centre (and Technical Information Bureau), High Street, Prahran.

The U.F.O. is "a non-profit organisation financing and investigating all phases of Unidentified Flying Object phenomena."

But members are in urgent need of a method of obtaining immediate reports of "sightings, &c."

The number to ring immediately that cigar-shaped, luminous thing-a-m'bob is sighted over the homestead is LA4948 or UY8027.
