

FLYING SAUCER BLAMED AGAIN

**KOLDING (Denmark),
Sunday (A.A.P.-Reuter). —**
Denmark's unofficial space-
ship investigation organisa-
tion claims that it found
"sucking-marks" in the snow
which might have been made
by a flying saucer landing
and taking off.

A team from the organisa-
tion scoured the area after
a farmer reported a strange
light in his field when return-
ing home at midnight from
a church meeting.
