

Hovercraft Makes Second Flight

**LONDON, Tuesday (A.A.-
P-Reuters).** — Britain's first
flying saucer, the Saunders
Roe Hovercraft, flew again
late yesterday at Cowes, in
the Isle of Wight.

A wind which had blown
in hard gusts all day abated
sufficiently for an early-even-
ing flight, and the craft flew,
as it did on Sunday, un-
tethered and up to a foot off
the ground. A Saunders-Roe
spokesman said later that the
flight showed that work on
the craft was going according
to plan.
