

# 'Flying Saucer' Sighted In Queensland

**BRISBANE, Monday. —** Two prominent businessmen and two doctors, returning from a crocodile hunting expedition, said to-day they had seen what appeared to be a "flying saucer" about a week ago.

They said they had seen the object shortly after 6.30 p.m. on Wednesday about 20 miles down the Norman River from Karumba.

They described the object as about half the size of a full moon with an exhaust-like tail.

The men are Mr. J. Horn, a director of General Motors Holden; Mr. W. A. Green, managing director of Eagers Holding Ltd., of Brisbane; Dr. Athol Quayle, of Brisbane, and Dr. C. A. M. Renau, of Melbourne.

The object was also seen by a number of people fishing at Karumba. They said it

at Karumba. They said it flew parallel to the ground and was intensely light against the darkened sky.

They said it appeared to be a mixture of green, yellow and red iridescent light with sparks coming from a short tail.

The object stayed in the sky for about eight seconds and then disappeared completely. It made no sound although it appeared to be only about 2,000 feet up.

Residents of Karumba said a similar object was sighted over the town about three years ago.
