

Group Predicts Major Event

LONDON, Monday (A.A.P.).—A South African delegate to a flying saucer conference claimed yesterday the sun was entering into a phase in the heavens which was consistent with the arrival of a new ruler on earth.

The delegate, Mr. D. Baker, was speaking at the two-day conference of the Aerherius Society—the first flying saucer convention to be held in the United Kingdom.

He said members of the society believed something “as important as the birth of a new Messiah” would happen in something less than 12 years.

The last occasion on which the sun was in an identical position to the forthcoming phase heralded the birth of Christ, he claimed.
