

"FLYING SAUCER" JERUSALEM

JERUSALEM (Itim). — A flying saucer passed over Jerusalem recently, according to eye witnesses in the Holy City.

It was first sighted by children as it moved across the sky in a northerly direction shortly before sundown. The excited youngsters called to their parents and for about 10 minutes the entire neighbourhood watched the passage of a vague, luminous object in the sky.

One woman who saw it said it looked "a bit like a saucer with a rounded bottom and was followed by a vapour trail. After nearly a quarter of an hour it seemed to change shape, made a sharp turn and disappeared into thin air."

None whose attention was drawn to it failed to spot it.
