

## Was it a Flying Saucer?

A dairy-farmer returning home at 9.45 p.m. on July 25 believes he may have seen a flying saucer.

He is Mr. Arnold Maslin, of Hindmarsh Tiers. The object was also seen by Mr. Maslin and members of his family the following night.

Speaking for her husband, who is partially deaf, Mrs. Maslin said this week that he had described the object as about 30 ft. long, slightly resembling a new moon on its back, with an orange glow at the centre. It was pointed at one end.

With Mr. Maslin was his 11-year-old son George. After arriving home they climbed from their car and watched the glow for about ten minutes before it disappeared.

The next night Mr. and Mrs. Maslin, their eldest girl Judith and two other young children saw a large orange light low down in the western sky when they were returning home from the drive-in theatre at Port Elliot. It was visible for about a minute as they drove towards the Victor Harbour - Adelaide turnoff and then it disappeared in the direction of Green Hills.

Mrs. Maslin said it was "a

**GREEN LIGHT.**  
Mrs. Maslin said it was "a terrific size" and too big to be a moving light.

"I have never seen anything like it before," added Mrs. Maslin.
