

Light seen in sky

PERTH, Monday.—Two unidentified flying objects were seen near Onslow, 890 miles north of here, on Saturday night and early yesterday morning.

Several people at the Onslow open air theatre saw a light pass slowly across the sky at normal aircraft altitude, on Saturday night.

One man said the light was moving slowly from south to north and appeared to have a bright head and a vapour trail.

He said he saw the light for about four minutes, but did not think it was an aircraft.
