Flying saucer landing described by youth

BUENOS AIRES, Monday, (AAP-Reuter). — Reports of a flying saucer landing provoked fresh speculation yesterday in the fever of sightings of unidentified objects over Latin America.

A youth was reported as saying he saw a four-legged object touch down for two minutes in broad daylight on Saturday on a beach just across the River Plate in Uruguay.

He was quoted in Buenos Aires as saying the object shot skywards in a blinding flash after a tug had hooted a siren.

One of several Uruguayans who claimed to have seen the object of Honda Beach said it had a circular centre, with flattened, oval extensions on each side.

The description by the Uruguayan tallied with a photograph published here on the front page of a newspaper. It was stated to have been taken as an unidentified object hovered over a gas plant in the southern city of Bahia Blanca.

The present sighting started about a fortnight ago with Argentine, British, and Chilean scientists reporting that they had seen mysterious objects hovering over the horizon in the antarctic, and sending their geo-magnetic instruments wild.
