

Reports on UFO not ready

RAAF investigators have not yet completed their report on two unidentified flying object sightings in Canberra within the last fortnight.

The first sighting was reported by air traffic control officers of the Department of Civil Aviation of a white object north-east of the control tower on July 15. This is believed to have been a daylight appearance of the planet Venus.

Last Monday night, reports were made of a "white object with a tail" which flashed across the sky and was visible for about four seconds.

This is believed to have been a meteorite or a rocket body burning up on re-entry into the earth's atmosphere.
