## Flashing light 3404 saucer scare

**BRISBANE, Sun.**—An unidentified flying object, very similar to one seen over Tenterfield three times last week, is reported from Beaudesert, more than 100 miles south-west of Brisbane.

The object is described as "a very bright light, with no definable shape."

It was seen over Beaudesert by Mr. Roy Hodgson, managing director of the local newspaper.

He said: "It gave me a real shock. I've never seen anything like it before."

Mr. Hodgson saw it at ten minutes to eight in the evening as he was standing in his back yard.

He said: "It moved slowly south-south-west and seemed to accelerate as it drew away."

There was no noise and the object flashed alternate red and white lights.

Over the border in Tenterfield, two residents are standing by with a light aircraft waiting for the object to re-appear.

They are crop dusting pilot Ted Hunt and garage proprietor Lindsay Ross.

They hope to get close enough to take a picture with a camera fitted with a telephoto lens.

The object was first seen over Tenterfield on Wednesday night.

It was visible for five hours. It returned for shorter visits on Thursday and Friday night.
