# Saucer seen

HILLSDALE, Michigan, Wednesday (AAP). — The United States Air Force is arranging an expert investigation of reports that glowing unidentified flying objects have been hovering over Michigan this week.

A civil defence director, an assistant college dean and 87 students reported yesterday that they watched a glowing object zip past a college dormitory here.

Their description of the eerie object tallied closely with that of one seen by more than 50 people, including 12 policemen, near Ann Arbor, Michigan, the previous night.
