

UFO seen near Canberra

Mr L. J. Potter, of Mac-kennal Street, Lyneham, was still "excited and trembling" yesterday about an UFO (unidentified flying object) he sighted west of Canberra on Saturday.

Mr Potter described the object as circular, about half the size of the sun, its centre the colour of mercury and its edges shimmering. "It was pointed out to me by a taxidriver at the Hackett shops. We watched it until it went behind a big cloud", he said.
