

# Flying saucers

Sir, — I am secretary of the Canberra UFO Research Society and I wish to contact people in the Canberra district who have had sightings of UFO's, or flying saucers, as they are commonly called.

We have had many sighting reports from Canberra, but there must be many more people who have had a sighting and have not mentioned it for fear of ridicule. All reports to this society are confidential unless permission is given by the person concerned, and all reports are given serious attention.

Due, maybe, to better world communication or to the scientific age that we live in, the UFO is not the laughing matter that it was. However good the sighting it does not help unless we know about it, so once again I appeal to Canberra people to ring me or write to the society with information.

(Mrs) VICKI KLEIN
