

# 'Flying saucer' seen by pilot

BUENOS AIRES, Tuesday (AAP-Reuter). — A veteran Argentine State Airline pilot's reported sighting of a flying saucer has caused excitement less than a week after reports of a mysterious "space snatch".

Newspaper reports last Tuesday and Wednesday told of an Argentine couple said to have been plucked with their car from a quiet country road near Buenos Aires and deposited in Mexico, almost 5,000 miles away.

Now Aerolineas Argentinas pilot Ulises Tivioli, 54, has said that he sighted a long, bright, cigar-shaped object that flashed yellow and red at both ends near the southern tip of Chile on Thurs-

day night.

According to the Buenos Aires newspapers La Razon and La Nacion, a couple named Vidal were driving home in the little town of Maipu when they ran into fog and remembered nothing else until they awoke in their car on a dirt road in the interior of Mexico 48 hours later.
