

# TRIANGULAR U.F.O. SIGHTED AGAIN IN SPAIN

MADRID, Sunday (AAP). — A Spanish meteorological station reported a fresh sighting of an unidentified flying object yesterday.

The report came shortly after a flying object had been witnessed by thousands in Madrid on Thursday night.

The meteorological station at Cuenca, north-east of Madrid, said it kept a UFO under observation for several hours.

The object remained stationary at a great height for more than three hours, then moved off in a westerly direction.

The object appeared to be triangular, the same

---

shape as that seen in Madrid.

The Spanish Air Force has suggested in a communique that the latest sightings may be of a

sightings may be of a meteorological balloon making tests for future flights of supersonic aircraft.

One such balloon came down in Logrono, in northern Spain, on Friday, and was quickly claimed by technicians from the French National Centre for Space Studies.

The technicians said they had followed the balloon from Pau, in France, by car and aircraft and there was no possibility that it could have accounted for the UFO sightings in Madrid and Cuenca.
