

# UFO society meets

The president of the Unidentified Flying Objects Investigation Centre, Mr F. Phillips, addressed a meeting of the Canberra Unidentified Flying Objects Research Society on Saturday night.

Mr Phillips spoke of the difficulties of obtaining information about unidentified flying objects and outlined the theories of the sources of these objects.

---

Last week there were a large number of reports of unidentified flying objects in the ACT. The most important of these was sighted on Wednesday night. It was registered by a detector which traced it for 20 minutes.

Observers said that they were able to see the object above Mt Majura from two miles away with binoculars. The object was not registered on radar.
