Flying Object Over Town Is Identified

GLACE BAY—The unidentified flying object that flew over Glace Bay two night's ago isn't unidentified anymore. Police received several calls around ten o'clock in the evening that an object with several flashing lights and noiseless was hovering over the town.

Town Police checked the reports with the tower at Sydney Airport and the mystery was solved.

The UFO was a one engined Piper plane on manouvers and the pilot had cut his engine for a time as he soared over Glace Bay.
