

BEAUTIFUL UFO SEEN AT SEA

"It was beautiful, changing from green to blue and then yellow during the few seconds it took to cross the horizon."

Mr Ken (Kiwi) White said this when describing the UFO which he and Mr Bob Baker aboard the cray boat Flinders Star saw while at sea on Monday week.

The men were sitting on deck at 10.20 pm watching TV, when Mr White looked up to comment on the calmness of the evening. He momentarily thought the light in mid-sky was a falling star.

"The light travelled from west to east extremely fast, taking only a matter of seconds," Mr White said. "It was obviously an UFO."

"As it moved its colours changed and, before disappearing, intensified," he said.
