MYSTERY LIGHTS

Have we a local base for unidentified flying objects? Is some new and secret industry operating under cover?

These and other questions are flying through our mind as we think over the report which came to the desk this morning.

A Boambee resident, whose property overlooks Boambee Waters, has been observing strange lights each night. Some soar up into the sky, others zig zag across the horizon and on a couple of occas-

and on a couple of occasions he has seen what he feels could almost surely be a rocket's trail.

The lights vary in colour, size and direction, but only on one Sunday during the past couple of weeks has there been an occasion when the lights did not "perform".

We wonder has any other resident seen this phenomenon, or has anyone an explanation?

Sawtell School Teacher, Mr. G. Goodenough's lovely lottery win just before school broke up was, from all reports, a very popular win.

Last week's issue marked the third birthday of the paper, and so blase have we become that it passed without a cake or a candle. Doesn't it show how much a part of our everyday week the old Guardian has become.
