

# U.F.O. SIGHTING

Two young Victor Harbour men believe they sighted an unidentified flying object Tuesday night of last week.

Daryl Jones and Robert Hook were driving towards Strathalbyn at 10.40 p.m. and when a mile past the native canoe tree saw three bright lights in a triangular formation about 45 degrees in the sky slowly moving easterly.

They kept the lights under observation for perhaps two minutes and then more lights appeared until there were thirteen. After watching for about five minutes the men continued on towards Strathalbyn. At the Finniss turnoff, six miles from the initial sighting, six lights were again sighted, this time lower in the sky and

lower in the sky, and they seemed to settle among some trees about a half-mile distant. From the roadside the lights were seen by the tree for about five minutes.

The sightings were reported to police at Strathalbyn and the officer received authority from Adelaide to accompany Messrs. Jones and Hook to the scene in a police car. When the party arrived, however, the lights had disappeared.
