

TWO MORE "NESTS" FOUND

Two flying saucer "nests" have been found 100 metres apart in the hills at Poonindie.

After reading about the Bray nest, farmer Mr Don Laube of Boston View investigated two marks he had noticed some time previously.

He said the first appeared identical in size to the Bray "nest" while adjacent to it was a smaller "nest".

Mr Laube said he could offer no explanation for the marks which are on ground he described as very hard, being difficult to plough and which overlooks the aerodrome.
