

Saucer sighting worries women

PERTH, Tues, AAP. — Two women are still distressed following the sighting of UFOs near their homes in Meekatharra, 640 kilometres north-east of Perth.

Ten people in the town were reported to have seen the strange saucer-shaped silver and red objects

A chef in the town, Mr Victor Trace, said they watched for seven minutes.

"When it was over we could not believe what we'd seen," he said.

Mr Trace said that he, his wife, Angela, and son, Craig, aged eight, had seen a saucer-shaped silver object with a dome on top at about 2.30 on Sunday afternoon.

They were then joined by their other five children and a neighbor, Mrs Thelma King-Kingswood.

Mr Trace said: "It was impossible to say how far away it was. It looked to be about the size of a dinner plate.

"It was very bright on top. We had to shield our eyes to look at it.

"It was swinging and appeared to be wobbling at the same time.

"Then a most amazing thing happened.

"A bright red object came out of the side of the silver one. "The two were then side by side.

"We simply could not believe our eyes. I don't believe in these things.

Mr Trace said they were all in a state of "panic".

"I had a camera in the house and never thought to get it", he said.

"Suddenly, the red object shot upwards and out of sight at enormous speed.

"That left the silver one.

"Then it disappeared in the same way as the red one".
