

ISRAELIS ALSO SIGHT UFO'S

JERUSALEM: After the current wave of reports about "unidentified flying objects" in different parts of the world, Israelis have been getting into the picture too.

Several early-rising Jerusalem residents have telephoned the police to report the "sighting" of some unusual "big blue lights" moving over the Mount of Olives.

At first the reaction was sceptical, until a police unit patrolling in the same area also reported similar strange sights.

The Air Force and the Metereological Bureau contacted said: "We'll look into it."
