TEL AVIV (JTA): The Israeli press recently carried accounts of many people, who claimed they saw unidentified flying objects after watching Australian television films of reported mysterious flying saucers.

Israel television broadcast film clips of reported UFOs in Australia and New Zealand.

Most of the Israeli reports came from Jerusalem. Yedioth Achronoth said some Israelis claimed they saw luminous, round objects even before the film clips were run on TV.

Haaretz wrote that scores of Jerusalem residents and policemen saw "three objects in extraordinary shades of red, blue and purple — like diamonds sparkling in the sun, the size of large flashlights. They moved forward, going up and down . . ."

down . . ."

The objects alternated colours and finally disappeared after one and a half hours, according to Haaretz.

Haaretz said police thought the reports were a hoax until they witnessed the saucers while checking out the numerous calls. Police later reported to the Air Force, but nothing registered on their radar screens.
