

Object may be meteor

An object which could have been a UFO, sighted by three Inman Valley people and reported in the previous edition of the Victor Harbor Times, may have been a meteor.

Mr. Michael Robertson, of Victor Harbor, was one of six people who saw the object from Waikerie at about 10 p.m. on Saturday, January 26.

They saw it change in color from white to

red. "Then there were sparks and that was the last we saw of it".

THE LAST WE SAW OF IT .

Mr. Robertson said the group had believed it was a meteor.

Meanwhile, another sighting of the object has also been reported to the Times.
