

'LOW' YEAR FOR U.F.O's.

The annual report of the Tasmanian U.F.O. Investigation Centre reports the last 12 months has seen the lowest number of unexplained reports to the Centre in over 10 years.

However, a number of the cases investigated had a "high strangeness level".

The Centre said it would appreciate any information which could be passed on to the Centre with UFO reports. The public are asked to contact K. Roberts on Hobart 23 6009, in the evening.

The Centre's Secretary, Mr. S. Brooks, said

he was keen to bring to the public's attention throughout the State the Centre's genuine interest in investigating sightings and providing information.
