

STAR MATERIAL

Diane O'Connor (at left) giving directions to two students and FLT John Smith for a sequence on UFO's for the Victorian Education Department's Film Unit.

Diane, a former school teacher, and now a director with the unit, requested a pilot for the project.

So FLTLT Smith was 'seconded' for the duty as expert RAAF spokesman on UFOs, or as it is now known, unusual aerial sightings.

The short sequence will be shown to young Victorian school children later this year.
