

UFO LASER CLAIM

KUALA LUMPUR, Sun, AAP — A flying saucer launched a near-miss laser beam attack on an oil installation terminal at Malaysia's west coast Port Klang last Sunday, according to eye-witnesses.

Three people have told police that they saw the UFO (unidentified flying object) blast a house with a laser beam and start a fire which destroyed two houses and a shop only six metres away from the Felda and Caltex oil terminal.

The eye-witnesses, who asked not to be identified said they were driving from Port Klang towards

Kampung Berembang when they saw a bright luminous ball-like object about 10m above the oil installation.

WOM.

It was bluish-red and spinning, they said.

The eye-witnesses said they drove on and saw the object hovering above the house nearest the oil tanks. When they

stopped their car about 30m away, they saw the object emitting a laser beam like a bolt of lightning which hit the house nearest to the tanks.

"I have a good pair of eyes and I knew I was not dreaming," one witness said. "Anyway I had two friends with me and they both saw what I saw."

Police have so far declined to comment.
