saw a big bright light above a hill at Kanudi about 10.30pm last Tuesday.

He was sleeping at the back of his parents' car, when he was suddenly awakened by the lights of the object, he said.

This was only a week after similar sightings were made over Gaire village, about 36km east of Port Moresby.

Noel told the Post-Courier yesterday, the object eventually landed on the hill, and he saw two human being-like figures appear.

"The first one to come out appeared silvery and the second was brown in color," Noel said.

Although Noel

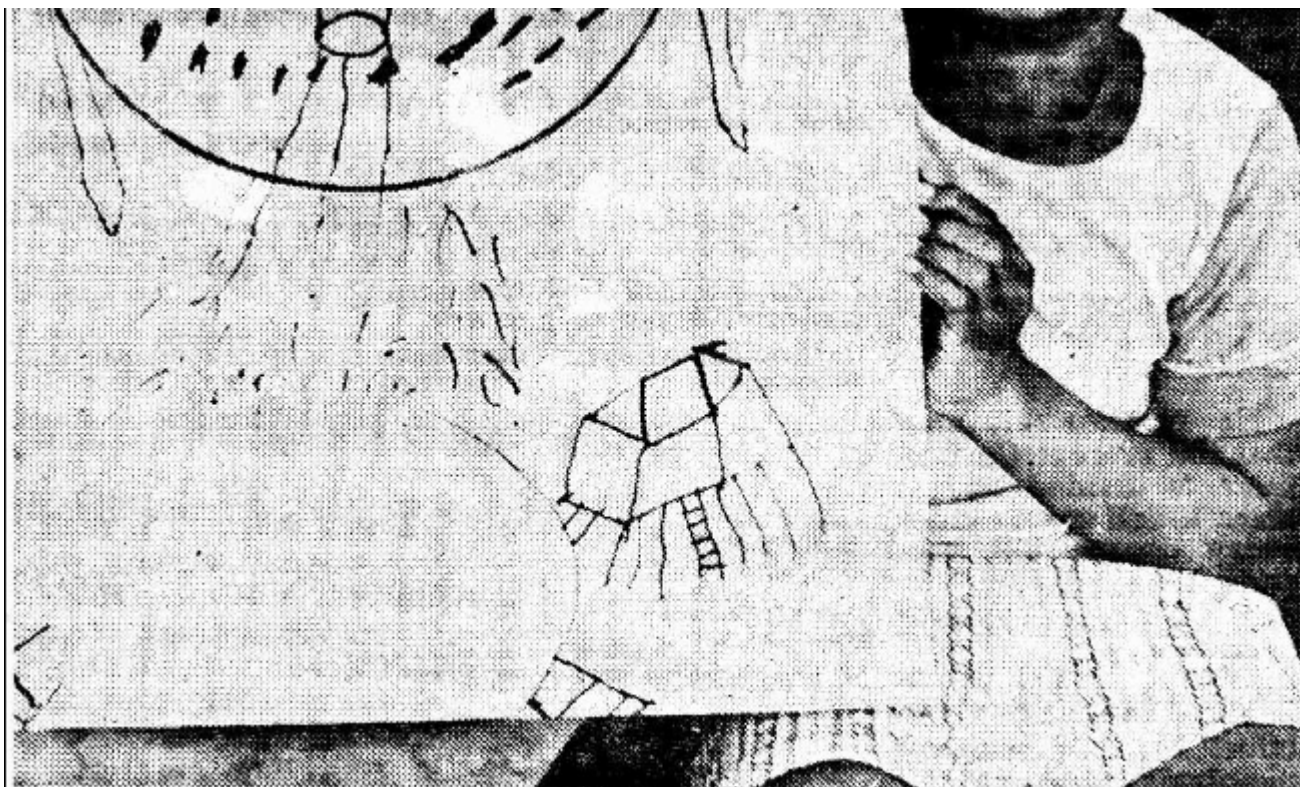

Although Noel does not attend school, he drew a picture of what he sighted to help him explain.

He said he was so frightened that he

did not tell his parents about the sightings until they were in the house.

Noel is keeping the sketch of his "flying saucer" with him at Baruni village.
