

# **Film plan on missing aircraft**

**MELBOURNE:** A Melbourne film producer, Mr Ron Cameron, wants to make a documentary about a light aircraft which disappeared over Bass Strait more than four years ago.

Its disappearance had sparked speculation of UFO involvement because the pilot, Mr Frederick Valentich, had said in his last radio message that strange metallic objects were following him.

Mr Cameron said two divers had found the wreckage of the single-engined Cessna which had disappeared on October 21, 1978. They had offered to sell him photographs of the wreckage for "a large sum".

A spokesman from the Department of Aviation said yesterday that there was no proof the wreckage and pictures were genuine.
