

The Times District News in Brief

Former local sights UFO

Former Victor Harbor resident, Wayne Trembath, had a close shave with the 'twilight zone' recently.

Wayne and two friends were interviewed on current and social affairs program, Terry Willesee Tonight, on Tuesday and told of their encounter with a UFO in the far north of Western Australia.

While on a delivery run, a semi truck and utility were followed by the object for 80kms with the men recording four sightings during four hours.

One of the reason this encounter has gained media attention is the credibility of photographs taken by the group during the sightings.
