

Crop circles UFO link

A TOURING British lecturer in extra-terrestrial activity says the serious crop circles appearing in Australia are directly linked to UFO activity.

Palden Jenkins, who describes himself as a futurologist and historian, told the Sunshine Coast branch of UFO Research Queensland that although British scientists had no simple answer to the phenomena, they believed they were signals from space "to remind us of our purpose for being here".

He said: "The circles in Britain are created on energy lines, which flowed through to Australia, linked to ancient

sites dating back 5,000 years. Of those discovered in Britain only 10 per cent or less are hoaxes.

"The circles are immaculate. They contain symbols which are unique. One design contains the coding for the molecular chain of our DNA bombarded by UV light.

"The circles change the molecular structure of the crop itself."

Mr Jenkins said that in Britain the circles were responsible for the creation of a time warp — observers had lost hours inside the circles which they could not explain.
