

## ● METEOR THEORY

# UFO saved our planet

A Russian scientist claims an alien spaceship sacrificed itself to prevent a meteor destroying earth a century ago.

According to London's *The Sun*, Dr Yuri Labvin, head of the Tunguska Spatial Phenomenon Foundation, has found quartz slabs with strange markings that he thinks were part of a UFO control panel.

He made the discovery near the site of the so-called "Tunguska event" - a massive, unexplained explosion that devastated a Siberian forest in 1908.
