

THAT'S LIFE

A WOMAN claims she was cut off by two alien beings in a spaceship shaped like a Ford station wagon — before it took off surrounded by green, blue and red flames.

Betty from Alice Springs told a Northern Territory radio station about her close encounter, when she and her six-year-old daughter saw the vehicle “flying alongside us” as they drove through the

outback at 4am one morning in 1969.

“We saw these two figures inside this thing. It looked like a Ford station wagon, with the windows. It came in front of us really quickly.”

Betty’s daughter then said “there’s nothing to be afraid of”. “I said ‘why did you say that?’. She said ‘I don’t know, it just came out of my mouth’.”
