

● MAG CLAIM

Nazi UFO bid to zap cities

Claims were made today that the Nazis had embarked on a UFO building program to destroy London and New York with long-distance flying saucers.

The program, under the command of SS officer Hans Kammler, was said to have made significant breakthroughs in anti-gravity experiments towards the end of World War II.

German science magazine *PM* claims there is "strong evidence" Nazi UFO plans were well advanced - and suggests prototypes may have flown over London.
