

● WESTALL INCIDENT

Mystery history lesson

The Melbourne suburb of Westall will forever be etched in Australian history after 200 students and teachers witnessed an unexplained flying object on Wednesday April 6 1966.

During recess, students and teachers of Westall High School noticed an object descend into a nearby field, then quickly take off and vanish into the sky.

Although some witnesses claim military officials examined the site following the incident, none have been able to obtain an official RAAF report.
